NIKHIL KHATRI

+91 8104158111 | nikhilkhatri017@gmail.com | linkedin.com/in/nikhilkhatri017 | github.com/nikhilkhatri017

PROFESSIONAL SUMMARY

Computer Science graduate with hands-on experience building Java and Python applications, REST APIs and distributed microservices. Experienced in Spring Boot, event-driven communication, secure API development, database integration, automated testing and CI/CD. Built end-to-end projects spanning backend engineering and AI-enabled workflows, with a strong foundation in data structures, algorithms, object-oriented programming and core computer science.

TECHNICAL SKILLS

Programming: Java, Python, SQL, JavaScript
Computer Science: DSA, OOP, DBMS, Operating Systems, Computer Networks, System Design
Backend & Architecture: Spring Boot, Spring Cloud, Spring MVC, Spring Security, Hibernate/JPA, REST APIs, Microservices, Event-Driven Architecture, FastAPI
Testing & Tools: JUnit 5, Mockito, TDD, Maven, Git, Postman, SLF4J/Logback, IntelliJ IDEA
Cloud & DevOps: AWS, Docker, GitHub Actions, CI/CD
Databases & Security: PostgreSQL, MongoDB, MySQL, SQLAlchemy, OAuth2, JWT, Keycloak, BCrypt
AI & Frontend: LangGraph, LangChain, Google Gemini API, Groq LLMs, TensorFlow, Keras, OpenCV, React, Redux

SELECTED SOFTWARE ENGINEERING PROJECTS

FITNESS MICROSERVICES PLATFORM

Java | Spring Boot | Spring Cloud | RabbitMQ | PostgreSQL | MongoDB | Keycloak | Docker | GitHub Actions | Nov 2024 – Mar 2025

- Designed and developed a distributed application comprising six independently deployable Spring Boot services, including API Gateway, service discovery, centralized configuration, user, activity and AI services.
- Implemented API authentication using Keycloak, OAuth2 and JWT; used RabbitMQ for asynchronous inter-service communication to reduce synchronous dependencies and improve service isolation.
- Integrated PostgreSQL and MongoDB for relational and activity data, added a dedicated Google Gemini-powered recommendation service, and automated build/deployment workflows with Docker and GitHub Actions.

Project: github.com/nikhilkhatri017/fitness-microservice

JOURNALAPP — SECURE SPRING BOOT REST APPLICATION

Java | Spring Boot | Spring Security | MongoDB | JUnit 5 | Mockito | Maven | GitHub Actions | Oct 2024 – Feb 2025

- Built secure REST APIs for CRUD operations using Spring Boot, Spring Security and MongoDB, implementing authentication and authorization.
- Applied Test-Driven Development using JUnit 5 and Mockito to test service-layer business logic; automated Maven build and test execution through GitHub Actions on code commits.

Project: github.com/nikhilkhatri017/journalApp

AI-FIRST CRM BACKEND — AGENTIC AI DATA EXTRACTION

Python | FastAPI | LangGraph | LangChain | PostgreSQL | SQLAlchemy | Aug 2025 – Oct 2025

- Developed a LangGraph workflow with six specialized LLM-powered tools for intent classification, structured data extraction, form editing, compliance validation, follow-up generation and summarization.
- Implemented REST endpoints using FastAPI with SQLAlchemy and PostgreSQL persistence; integrated validation into the workflow before data persistence and connected the backend to a React/Redux frontend.

Project: github.com/nikhilkhatri017/ai-first-crm-hcp

EXPERIENCE

BUSINESS OPERATIONS | FAMILY RETAIL BUSINESS | *Jhalawar, Rajasthan | Jul 2025 – Aug 2026*

- Coordinated daily retail operations including inventory tracking, procurement, supplier coordination, sales reconciliation and customer interactions.
- Maintained financial records, tracked expenses and vendor payments, and supported customer relationship management and issue resolution.

EDUCATION & LEADERSHIP

B.Tech, Computer Science and Engineering | Silicon Institute of Technology, Silicon University | Dec 2021 – Jul 2025 | CGPA: 7.97/10

Joint Secretary, Silicon University Student Council — coordinated inter-departmental activities, supported student affairs and represented student interests; awarded Best Council Member (FY 2024).

CERTIFICATIONS

Deep Learning — IIT Ropar NPTEL (2025) • Generative AI — Syllogistek Systems (2024) • Data Science & ML — Syllogistek Systems (2023)
